The International Organization for Standardization is an international standard-setting body composed of representatives from various national standards organizations. Founded on 23 February 1947, the organization promotes worldwide proprietary, industrial, and commercial standards. It is headquartered in Geneva, Switzerland, and works in 164 countries. It was one of the first organizations granted general consultative status with the United Nations Economic and Social Council.

[International Organization for Standardization - Wikipedia](#)

We're ISO, the International Organization for Standardization. We develop and publish International Standards.

[ISO - International Organization for Standardization](#)

ISO standards are internationally agreed by experts Think of them as a formula that describes

the best way of doing something. It could be about making a product, managing a process, delivering a service or supplying materials – standards cover a huge range of activities.

~~ISO – Standards~~

ISO 14229 has been established in order to define common requirements for diagnostic systems, whatever the serial data link is. To achieve this, ISO 14229 is based on the Open Systems Interconnection (OSI) Basic Reference Model in accordance with ISO 7498-1 and ISO/IEC 10731, which structures communication systems into seven layers.
