Management

Nuclear knowledge has been developed and accumulated over decades of research on and development of nuclear technologies for power and non-power applications. This article is an attempt to summarise the development of nuclear knowledge in the past, its present status and unique characteristics and define a concept of nuclear knowledge management.

and sharing of new knowledge and the updating of the existing knowledge base. Knowledge management is of particular importance in the nuclear sector, owing to the rapid development and complexity of nuclear technologies and their hazards and security implications. The International Atomic Energy Agency launched a nuclear knowledge management programme in 2002.

Several nuclear receptors have also been associated with head and neck cancer, and strategies targeting these molecules are currently tested in clinical trials. However, reports and molecular knowledge on the pathobiological relevance of nuclear receptors for cancers of the head and neck is currently rather fragmented.
