~~Introducing Erlang: Getting Started in Functional ...~~

1 Introduction. This section is a quick start tutorial to get you started with Erlang. Everything in this section is true, but only part of the truth. For example, only the simplest form of the syntax is shown, not all esoteric forms. Also, parts that are greatly simplified are indicated with *\*manual\**. This means that a lot more information on the subject is to be found in the Erlang book or in Erlang Reference Manual.

Functional Programming

```
1 > Now type in "2 + 5." as  
shown below. 1 > 2+5. 7 2 >  
In Windows, the shell is  
started by double-clicking  
on the Erlang shell icon.  
You'll notice that the  
Erlang shell has numbered  
the lines that can be  
entered, (as 1 > 2 ) and  
that it has correctly told  
you that 2 + 5 is 7!
```

~~Getting Started with Erlang~~  
Erlang was developed by  
Ericsson to aid in the  
development of software for  
managing a number of  
different telecom projects,  
with the first version being  
released in 1986, and the  
first open source release of  
the language in 1998.

~~Introduction to programming in Erlang, Part 1: The basics~~

The Run-Time System, when starting, follows the instructions of a thing called a boot script (which nobody writes by hand) that specifies what to start. Erlang, by default, provides boot scripts that load a minimal amount of code required to start a shell and write your own applications.
