Introduction To Stochastic Processes Solutions Lawler.  $X = (X_n: n \geq 0)$  is called a stochastic chain. If  $P$  is a probability measure  $X$  such that  $P(X_{n+1} = j | X_0 = i_0, \dots, X_n = i_n) = P(X_{n+1} = j | X_n = i_n)$  (2.1) for all  $i_0, \dots, i_n, j \in E$  and  $n \geq 0$ , then the sequence  $X$  shall be called a Markov chain. on  $E$ .

processes is the mathematical study of processes  
which have some random elements in it. Like what  
happens in a gambling match or in biology, the  
probability of survival or extinction of species. The  
book starts from easy questions, specially. Page 3/8.
