## Question Papers Inverse Trigonometric Functions Question Papers

When somebody should go to the books stores, search launch by shop, shelf by shelf, it is in fact problematic. This is why we provide the book compilations in this website. It will utterly ease you to see guide inverse trigonometric functions question papers as you such as.

By searching the title, publisher, or authors of guide you in point of fact want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be all best place within net connections. If you intention to download and install the inverse trigonometric functions question papers, it is completely easy then, since currently we extend the partner to purchase and create bargains to

## Maths Inverse ...

JEE Inverse Trig Functions Previous Year Questions With Solutions. Trigonometry is a measurement of triangle and it is included with inverse functions. There are six basic inverse trigonometric functions: arcsine, arccosine, arctangent, arccotangent, arcsecant, and arccosecant. In this article, we will illustrate about the topic of inverse trigonometric functions along with JEE previous year some problems.

Properties of Trigonometric Inverse

Functions. Here are the properties of the inverse trigonometric functions with proof.

Property 1.  $\sin^{-1}(1/x) = \operatorname{cosec}^{-1} x$ ,  $x \geq 1$  or  $x \leq -1$ ;  $\cos^{-1}(1/x) = \operatorname{sec}^{-1} x$ ,  $x \geq 1$  or  $x \leq -1$ ;  $\tan^{-1}(1/x) = \operatorname{cot}^{-1} x$ ,  $x > 0$ ; Proof :  $\sin^{-1}(1/x) = \operatorname{cosec}^{-1} x$ ,  $x \geq 1$  or  $x \leq -1$ , Let  $\sin^{-1}(1/x) = y$  i.e.  $x = \operatorname{cosec} y$

---

Properties of Trigonometric Inverse Functions: Identities ...

Skill 1: Evaluating Functions Evaluating functions involves putting numbers into the function to get the result. Example: A function is given by  $f(x) = 3x+1$ , Find  $f(10)$  All this requires is to replace  $x$  with 10 and calculate the result.. When we input 10 into this function that would look like:  $f(10) = 3 \times$

Functions Questions | Worksheets and Revision | MME

Trigonometry is important to mathematics as it involves the study of calculus, statistics and linear algebra. This article covers the identities of trigonometry and trigonometric equations, functions of trigonometry, properties of inverse trigonometric functions, problems on heights and distances. The trigonometry questions from the previous years of JEE Main are present on this page, along with the detailed solution for each question.

and it is included with inverse functions.  $\sin^{-1} x$ ,  $\cos^{-1} x$ ,  $\tan^{-1} x$  etc. represent angles or real numbers and their sine is  $x$ , cosine is  $x$  and tangent is  $x$ , given that the answers are numerically smallest available.

---

## Inverse Trigonometric Functions - Properties, Domain ...

At AH Maths we are required to learn about the inverse trig functions below: In the above, it is observed that every value of  $x$  has an infinite number of  $y$  values For an inverse function to exist it has to be one-to-one If  $y$  is restricted to  $-\pi/2 \leq y \leq \pi/2$  there is a one-to-one function
