### **Irrationality In Health Care What Behavioral Economics ...**

In light of healthcare, patients are not immune to calculability as the care they receive is increasingly a function of cost and financial return to the system. Rather than focusing on the quality of the service they are receiving, patients are overcome and focused on how much the service is going to cost.

### **Impact of McDonaldization on Healthcare**

This irrationality in health care prices — and the added cost to commercial insurance — has drawn the ire of patients, families, and employers who have sought greater clarity around prices and demanded answers about why the prices are higher than what the government pays for the same thing.
