In a large preserving pot, gently combine the peaches, sugar, and lemon juice and toss to mix. Let sit for a few hours or overnight to macerate. In a small food processor, pulverize the peppers with the ginger and salt. Add to the peach mixture.

Jam Session: A Fruit-Preserving Handbook [A Cookbook ...

Tips for making the perfect jam. Use fresh, seasonal fruit that's washed and dried well. Underripe fruit is preferable as it's higher in acidity and pectin, giving a better (more viscous) set. Ripened fruit is still fine, but will give a softer set. Soften your fruit first to draw out the pectin, before adding the sugar.

How to preserve food | making jam, pickling, dehydrating ...

The hot water bath method is quite popular for canning jams and jellies. It is important to always start with good fresh fruit to get the best results. So if you have fruit that has brown spots, blemishes, etc., you will need to cut those parts off in order to get the best taste and keep bacteria from growing inside the jar.
