Laser Marking Roфин

Laser marking of permanent text and graphics onto medical devices is achieved by several mechanisms including modifying the material colour, annealing metal surfaces, carbonisation, and foaming of polymers – It is possible to produce corrosion-free marks on stainless steels. There are almost no technical limits to the marking content, whether it is marking implants, delivery devices, or ...

Laser Marking ROFIN - Laser Material Processing Solutions

The Versatile Desktop Laser Marker EasyMark's new modular concept realizes a huge working area within an extremely compact housing. An all-glass lifting door provides barrier-free access to the working chamber. The system can be optionally equipped with a z-axis, various optics and external or through-the-lens camera solutions.
