The purpose of the present paper is to link the review of literature to the concept of construct validity using Messick's (1989, 1995) conception of validity as a unitary concept. Reviews of...

~~(PDF) Validity and the review of literature~~

Literature Review: Measures for Validity. By John Dudovskiy. "A literature review introduces the problem, develops the background by providing a history of scholarly work on the subject, and ends with the purpose and the rationale for the study" (Wysocki, 2007, p.215). According to Brown (2006) there are five criteria for the evaluation of the validity of literature review: purpose, scope, authority, audience and format.

We apply the strictest accepted standards to the measurement of population health outcomes to ensure our list of validated programs truly represent high-value health care.

~~Validation—Validation Institute~~

A common type of submission at any Journal is a review of the published information related to a topic. These are often returned to their authors without review, usually because they are literature reviews rather than systematic reviews. There is a big difference between the two (Table 1). Here, we summarise the differences, how they are used in academic work, and why a general literature review ...
