database to organize and program in such a way so that it generates methodical reports for each level of a company. Reports for some special events can easily be obtained from the management information system. In simple words, the Management information system or MIS provides feedbacks to managers themselves about their performances.

## 12 Different Types Of Management Information Systems

An information management system (IMS) is a set of hardware and software that stores, organizes, and accesses data stored in a database. It also provides tools that allow for the creation of standardized and ad-hoc reports. There are numerous kinds of IMSs that can perform specialized business functions, including the following examples:

### Management Information Systems : Managing the Digital Firm ...

A management information system is an information system used for  
decision-making, and for the coordination, control, analysis, and  
visualization of information in an organization. The study of the  
management information systems involves people, processes and  
technology in an organizational context. In a corporate setting, the  
ultimate goal of the use of a management information system is to  
increase the value and profits of the business. This is done by  
providing managers with timely and approp
