The manual transmission system is also called the manual gearbox. There are at least 5 gears in the gearbox of different sizes. Bigger gears slow down the vehicle, and smaller gears speed up the vehicle. You need to switch gears at the appropriate times while driving, according to how fast you need to go.

~~manual gearbox — YouTube~~

So let's bring this all together and walk through what happens whenever you shift gears in a vehicle. We'll begin with starting a car and shifting up to second gear. When you start a manual transmission car, before you turn the key, you disengage the clutch by pressing down on the clutch pedal. This disconnects power flow between the engine's input shaft and transmission.
