The IBM System i was a midrange computer platform from IBM, sometimes referred to generically by the umbrella term AS/400 or "AS400". The platform was first introduced as the AS/400 in June 1988, with the operating system being called OS/400. In 2000, IBM introduced the eServer iSeries. As part of IBM's re-branding initiative in 2006, it was again renamed to System i. In April 2008, it was replaced by a modern standards-based rack-friendly server line, IBM Power Systems. IBM Power Systems support
