Measurement And
Density Lab

Since the density of water is 63.4 pounds per cubic foot, the density of a material with a specific gravity of 0.9 is 57.1 lb/ft³, and the density of a material with a specific gravity of 1.3 is 82.4 lb/ft³. Thus, the

Download Free Measurement

Density of a material can be determined using a variation of the basic level measurement.

Density Measurement Lab Report

[qn8561gkg2n1]

Density () = Mass
(M) Volume (V)

Density is an intensive property, meaning it does not

Download Free Measurement

depend on the size of the object. A 1 mL sample of water, for example, has the same density as 1 gal of water. Mass and volume are extensive physical properties of matter, and vary with the size of the sample. Measurement.
