Ionic really excels at being cross platform and looking/feeling native without having to write two completely different applications. As far as I can tell it is up to the developers of the plugins to maintain them and not the ionic team so any problems that you have with pluugins will follow you right through with any cordova variants (phonegap, ionic etc.)

In my view, the migration from Ionic 3 to Ionic 4 is the most significant in the frameworks history, and it sets a course for Ionic that likely will not be deviated from for years to come. I say significant in the sense that it is of great importance/benefit, the actual work required to transition from Ionic 3 to Ionic 4 is much smaller than that of previous updates to the framework.
