Nikon OPTIPHOT-2 Manuals | ManualsLib

The Nikon Optiphot series of microscopes, produced in the 1980's, were top-of-the-line upright research microscopes. In general, they are built like tanks and it is not uncommon to see them still used everyday in real working environments. The Optiphot series is expandable, for phase contrast, polarization, DIC, episcopic illumination and epi ...

As leaders in imaging technology since 1917, Nikon Metrology manufactures industrial microscopes at the forefront of optical and technological innovation.

Industrial Microscope | Nikon Metrology | Nikon Metrology

Nikon is one of a few manufacturer of Microscope equipment who also produces software to operate and manage the imaging equipment. Because many issues with microscope imaging systems can be attributed to software applications, its great comfort to know that the company that manufactured the hardware, ALSO manufactures the software used to operate them.

Service After the Sale | Service | Nikon Instruments Inc.

For Nikon microscopes, there are at least two types of mercury lamphouse, one with the bulb horizontal, and the other vertical. There are also no less than three power supply connections, which must match the power supply. The bulbs themselves are fairly small arc lamps, being a little less than 4 inches long (100 mm).
