Mooring equipment can be the following: Mooring lines and shackles; Bollards; Fairleads; Winches; Each mooring equipment is specified by its Safe Working Load (SWL), which is what we need to determine. OCIMF provides a simple approach to calculating the SWL once environmental forces are calculated. OCIMF proposes calculation of a parameter called the 'Ship's Design MBL'.

~~OCIMF MEG 4 and Mooring Design of your vessels – Part I ...~~

OCIMF has published wind load data in 'Mooring Equipment Guidelines' (MEG3) which includes a method of estimating the wind loads. It is not intended to reproduce this data in its entirety in this paper, although relevant extracts are included. The wind force prediction is based on wind tunnel model tests using four models representing tankers of
