The aim of the present study was to identify the phytochemicals present in Gulgulupanchapala choornam and to assess its antibacterial and antioxidant activities. Agar well diffusion method was used for antibacterial studies of the formulation. The antioxidant potential of the choornam was analyzed by DPPH assay.

Phytochemical, antimicrobial and antioxidant evaluation of---

Phytochemical, Cytotoxic, and Antimicrobial Evaluation of the Fruits of Miswak Plant, Salvadora persica L, Mohammed Al Bratty,1 Haliz A. Makeen,2 Hassan A. Alhazmi,1,3 Sohier M. Syame,4,5 Ashraf N. Abdalla,6,7 Husham E. Homeida,4 Shahnaz Sultana,8 Waqar Ahsan,1 and Asaad Khalid 3,6

Phytochemical, Cytotoxic, and Antimicrobial Evaluation of---

Phytochemical and antimicrobial evaluation of leaf-extracts of Pterocarpus santalinoides. Author(s) : Chic, O. I.; Amom, T. A. T. Author Affiliation : Chemistry Department, University of Agriculture, Makurdi, Benue State, Nigeria. Author Email : toranyiint@yahoo.com

Phytochemical and antimicrobial evaluation of leaf---

MBCs and MFCs were done to establish the nature of antimicrobial activity of these extracts. Results: Qualitative phytochemical screening of leaf-extracts of P. santalinoides revealed presence of alkaloids, flavonoids, terpenoids, saponins-glycosides and tannins (except ethanol extract that contained no tannins).

Phytochemical and Antimicrobial Evaluation of Leaf---

In recent times, the use of plants as a source of vital compounds to combat microbial infections has gained prominence. The necessity to search for plant-based antimicrobials is increasing due to high cost, reduced efficacy and increased resistance

(PDF) Phytochemical and Antimicrobial Evaluation of Leaf---

The use of Lawsonia inermis extracts is of great significance as substitute antimicrobial agent in therapeutics. Phytochemical, toxicological and antimicrobial evaluation of Lawsonia inermis extracts against clinical isolates of pathogenic bacteria

Phytochemical, toxicological and antimicrobial evaluation---

The present study was intended to evaluate phytochemicals as well as antimicrobial (bacterial and fungal) activities of leaf extracts of Brucea antidysenterica. The powdered leaves of the plant were successively extracted with petroleum ether, chloroform/methanol (1:1), and methanol.

Phytochemical investigation and evaluation of---

Phytochemical Analysis and Evaluation of Antimicrobial Activity of Peumus boldus, Psidium guajava, Vernonia polysphaera, Persea Americana, Eucalyptus citriodora Leaf Extracts and Jatropha multifida Raw Sap. da Cruz JER(1), da Costa Guerra JF(1), de Souza Gomes M(2), Freitas GROE(1), Morais ER(1).

Phytochemical Analysis and Evaluation of Antimicrobial---

Methodology: Qualitative phytochemical screening and disc-agar diffusion methods were used according to standard method to determine phytochemical profile and antimicrobial activity of the aqueous extracts against four bacterial strains and a fungus.

Phytochemical and antimicrobial evaluation of selected---

Phytochemical, Antimicrobial, and Toxicological Evaluation of Traditional Herbs Used to Treat Sore Throat Arifa Mehreen , 1 , * Muzzamil Waheed , 2 Iram Liaqat , 3 and Najma Arshad 1 1 Department of Zoology, University of the Punjab, Lahore, Pakistan

Phytochemical, Antimicrobial, and Toxicological Evaluation---

Phytochemical, toxicological and antimicrobial evaluation of lawsonia inermis extracts against clinical isolates of pathogenic bacteria Iram Gull,1Maria Sohail,1Muhammad Shahbaz Aslam,1and Muhammad Amin Athar1 1Institute of Biochemistry and Biotechnology, Quid-i-Azam Campus, University of the Punjab, Lahore 54590, Pakistan

Phytochemical, toxicological and antimicrobial evaluation---

Jhonatas Em ílio Ribeiro da Cruz, Joyce Ferreira da Costa Guerra, Marcos de Souza Gomes, Guilherme Ramos Oliveira e Freitas and Enyara Rezende Morais*, " Phytochemical Analysis and Evaluation of Antimicrobial Activity of Peumus boldus, Psidium guajava, Vernonia polysphaera, Persea Americana, Eucalyptus citriodora Leaf Extracts and Jatropha multifida Raw Sap ", Current Pharmaceutical Biotechnology (2019) 20: 433. https://doi.org/10.2174/1389201020666190409104910

Phytochemical Analysis and Evaluation of Antimicrobial---

Phytochemical, Antimicrobial, and Toxicological Evaluation of Traditional Herbs Used to Treat Sore Throat Biomed Res Int . 2016;2016:8503426. doi: 10.1155/2016/8503426.

Phytochemical, Antimicrobial, and Toxicological Evaluation---

Leaf extracts of T. sessilifolius growing on five different host plants (Psidium guajava, Citrus lemon, Vernonia amygdalina, Persea americana and Jatropha curcas) were evaluated for antimicrobial activity of the plant. Powdered leaves of T.

(PDF) Evaluation of phytochemical and antimicrobial---

Evaluation of phytochemical and in vitro antimicrobial effects of Solanum lycopersicum Linn. (Tomato) on oral thrush and human cariogenic pathogens. Journal of Advances in Medical and Pharmaceutical Sciences. 2016;11 (4):1-9. Nnaemeka S, Achinewu C, Aniena MI.

Evaluation of Phytochemical, Antimicrobial Activities and---

Evaluation of Phytochemical Composition and Antimicrobial Activity of Sweet Potato (Ipomoea batatas) Leaf.I.E. Mbaeyi-Nwaoha and V.N. Emejulu: Abstract: Sweet Potato Leave (SPL) powder and its peptone, ethanol and water extracts were subjected to proximate, phytochemical, anti-nutrient and antimicrobial analysis. The results of proximate analysis revealed the presence of high carbohydrate (43 ...

Evaluation of Phytochemical Composition and Antimicrobial---

Phytochemical Evaluation, Antimicrobial Activity, and Determination of Bioactive Components from Leaves of Aegle marmelos Farina Mujeeb,1 Preeti Bajpai,1 and Neelam Pathak 1 1Department of Biosciences, Integral University, Kursi Road, Lucknow 226026, India Academic Editor: Paul M. Tulkens

Phytochemical Evaluation: Antimicrobial Activity, and---

Ethnomedicinal plants are being used as a source of medicine from ancient time but they lack the proof of modern scientific evidence for their effectiveness. This study focuses on the evaluation of...

Evaluation of Phytochemical, Antimicrobial, Antioxidant---

Being a part of Chinese as well as ayurdic herbal system, roots of Rumex hastatus D. Don (RH) is highly medicinal, used to regulated blood pressure. It is also reported that the plant is diuretic, laxative, tonic, used against microbial skin diseases, bilious complaints and jaundice. The present study is conducted to evaluate phytochemical, antimicrobial, antitumor and cytotoxic activities of extract obtained from R. hastatus roots.
