During plant tissue culture growth sucrose acts as a fuel source for sustaining photomixotrophic metabolism (organisms can use different sources of energy and carbon), ensuring optimal development, although other important roles such as carbon precursor or signaling metabolite have more recently been highlighted. Sucrose is a very important part of

Plant tissue cultures can be defined as the culture of all types of plant cells, tissues, and organs under aseptic conditions.

Nowadays, plant tissue culture is an integral part of molecular approaches for plant improvement and acts as an intermediary during gene isolation and genetic transformation.

as, shoot tip, root tip, callus, seed, embryo, pollen grain, ovule or even a single cell, whether the cultured tissue develops into a plant or grows unorganized depends on the genetic potential of the tissue and the chemical and physical environment.

**Tissue Culture: Definition, History and Importance**  
Plant tissue culture is a collection of techniques used to maintain or grow plant cells, tissues or organs under sterile conditions on a nutrient culture medium of known composition. It is widely used to produce clones of a

procedure, the plant-tissue is grown on a solid agar medium and always gives rise to tissue mass called a callus. This callus culture technique is easier as it is easier and even convenient for the initial maintenance of cell-lines, and also for carrying out the investigation studies related to ...

of the plant of interest. Tissue culture is therefore of great significance in biological studies due to its wide range of applications. The processes involved in tissue culture may be complex, requiring a lot of care to avoid such effects as contamination. gibberellins. Auxins and cytokinins, or more specifically, the balance between the two, is important for the organogenesis development in tissue culture plants. What are plant growth regulators? Plant growth regulars are tiny molecules that have a tremendous effect on a plant's development, and although found in small concentrations, they can have a significant influence on development ...
