This paper is based on work done by the author while at the Cowles Commission for Research in Economics and with the financial assistance of the Social Science Research Council.

~~PORTFOLIO SELECTION* Markowitz - 1952 - The Journal of~~
Markowitz portfolio selection Modern portfolio theory (MPT) is a method for constructing a portfolio of securities. It was introduced by Harry Markowitz in the early 1950s. Markowitz's portfolio selection approach allows investors to construct a portfolio that gives investors the best risk/return trade-off available.

~~Markowitz portfolio selection - Breaking Down Finance~~
Harry M. Markowitz is credited with introducing new concepts of risk measurement and their application to the selection of portfolios. He started with the idea of risk aversion of average investors and their desire to maximise the expected return with the least risk.

~~Markowitz Theory of Portfolio Management | Financial Economics~~
In finance, the Markowitz model - put forward by Harry Markowitz in 1952 - is a portfolio optimization model; it assists in the selection of the most efficient portfolio by analyzing various possible portfolios of the given securities. Here, by choosing securities that do not 'move' exactly together, the HM model shows investors how to reduce their risk.

~~Markowitz model - Wikipedia~~
There's no such thing as the perfect investment, but crafting a strategy that offers high returns and relatively low risk is priority for modern investors. While this hallmark seems rather straightforward today, this strategy actually didn't exist until the latter half of the 20th century. In 1952, an economist named Harry Markowitz wrote his dissertation on "Portfolio Selection", a paper that contained theories which transformed the landscape of portfolio management—a paper which ...

~~Portfolio Selection: Efficient Diversification of~~
This monograph is concerned with the analysis of portfolios containing large numbers of securities. Throughout we speak of "portfolio selection" rather than "security selection." A good portfolio is more than a long list of good stocks and bonds.

~~Portfolio Selection: Efficient Diversification of~~
Harry Max Markowitz is an American economist, and a recipient of the 1989 John von Neumann Theory Prize and the 1990 Nobel Memorial Prize in Economic Sciences. Markowitz is a professor of finance at the Rady School of Management at the University of California, San Diego. He is best known for his pioneering work in modern portfolio theory, studying the effects of asset risk, return, correlation and diversification on probable investment portfolio returns.

~~Harry Markowitz - Wikipedia~~
Harry Markowitz developed a theory, also known as Modern Portfolio Theory (MPT) according to which we can balance our investment by combining different securities, illustrating how well selected shares portfolio can result in maximum profit with minimum risk. He proved that investors who take a higher risk can also achieve higher profit.

~~Modern Portfolio Theory - Markowitz Portfolio Selection Model~~
Markowitz's ground-breaking research dates back to the 1950s, when he developed a theory for the allocation of risky financial assets. Known as the theory of portfolio choice, this theory analyses...
