*Practice Volumes Of
Prisms And Cylinders
Answers*

Cylinders are,
essentially, just
prisms with a circular
base, so finding the
volume of a cylinder is
just like finding the
volume of a cylinder.

Where To Download

The formula for the volume of a prism is $V = B \cdot h$, where V is volume, B is the area of the base, and h is the height of the prism. The base of a cylinder is a circle, which has area πr^2 . Height, obviously, is the same in a cylinder as it is in a prism.

Finding the Volume of
Prisms and ...*

So the volume of a prism is the area of the base (B) multiplied by the height between the bases (h), which we can just write as $B * h$. Now, back to that tent. The front, or face, is a triangle. If...
