Pratt & Whitney Canada PW100 -
Wikipedia

The PW100/PW150 engine family is the benchmark for low fuel consumption on routes of 350 miles or less. That means they consume 25% to 40% less fuel and produce up to 50% fewer CO2 emissions than similar-sized regional jets. Our engines are also biofuel compatible. Airlines and governments count on the reliability and versatility of our engines to fly in many challenging environments.
