Principles of Weaving. Weaving is very
simple. You essentially have two sets of
threads – one set, pre-wound, called the
warp, running vertically and kept under
tension, and the other set threaded
individually through the vertical threads,
usually at right angles, called the weft.

Weaving is defined as a Process of textile production in which two different sets of yarns or threads are interlaced or meshed with right angles and thus form a fabric or cloth. The lengthwise threads are called the warp and the widthwise threads are called weft or filling. The fabric or cloth made with this process is called woven fabrics.

one direction than the other. The lengthwise threads are called the warp, and the other threads, which are combined with the warp and lie widthwise, are called the weft (synonyms are “ filling, ” “ woof, ” and “ shoot, ” or “ shute ”). An individual thread from the warp, of indefinite length, is called an end; each individual length of weft, extending from one edge of the cloth to the other, is called a pick, or shot.

weave or binakul, and the multi-heddle weave (binetwagan or tinumballitan), among others. Among the complicated one is the brocade weave or pinilian, which uses sticks inserted on selected warp threads to create designs that float on the threads.

Weaving the Threads of Filipino Heritage | Tatler Philippines

Weaving encourages creative thinking and problem solving, it strengthens fine motor skills and it ' s an early introduction to more advanced skills like sewing, knitting and crocheting. By exposing our kids to these easy, beginner fibre crafts, we increase the chances of them embracing those advanced crafts as hobbies as they get older.
