What is Sensation in Psychology? - Study.com  
Answers for Chapter 5:  
Sensation Introduction  
Introduction Preview 1.  
Sensation refers to how we detect physical energy from the environment and encode it as neural signals. Perception refers to how we select, organize, and interpret sensory information. Sensory analysis, which works at the entry level, is called “bottom-up” processing.

**Answers:** Sensation and Perception According to College Board,  
"Psychologists study sensation and perception to explain how and why externally gathered sensations and perceptions impact behaviors and mental processes. Using input from several anatomical structures, the sensations we perceive process and interpret information about the environment around us and our place within it.
