DESIGN MANUAL FOR PURLIN AND CLADDING RAIL SYSTEMS

Trusses are the combined structures that are composed of beams, rafters, joists, and purlins. Truss is the name given to the full assembly of elements that supports a sloped roof. When new homes are built, the truss may be assembled on-site from dimensional lumber, or pre-assembled trusses may be brought in and installed on top of the building ...

What is the Difference Between a Beam and a Joist?

Eaves beams are manufactured from pre-hot dipped galvanised steel, Z275 coating and with a minimum guaranteed yield strength of 450 N/mm². Download our purlins technical manual located below for more information. Capacity. Based on single span condition. Nominal Dimensions

Eaves Beam Technical Details | Metsec

The Sleeved Purlin System is easily the most popular of the three zed purlin systems available from Hi-Span. Purlins achieve a high degree of continuity over the supports by employing connecting sleeves over joints. This means that design bending moments are distributed evenly along the building length, resulting in smaller section sizes and valuable economies achieved.

Sleeved Purlins - Hi-Span

Purlins to suit all types of modern roof construction with bay sizes up to 15 metres and rails designed specifically to support metal clad walls in horizontal or vertical applications. Multibeam can be used with all types of modern roof cladding systems. Requires fewer components than other systems. Quick to assemble for faster project completion.

Side rail support systems up to a sheeting height of 10m (see page 39 for recommendations) can be suspended from the bottom flange of the eaves beam. In such cases, a stiffening cleat (galvanised finish) must be included and the eaves brace overall length reduced by a further 6mm (cleat thickness). Cladding Flush with Column Face

Eaves Beam Details - Metsec

Metsec's Purlins Division is the UK's largest designer and manufacturer of light gauge galvanised steel purlins, side rails and mezzanine floor systems.Metsec offer a wide range of Z, C and Mezzanine floor sections designed to provide optimal levels of structural performance in roof, wall and mezzanine floor constructions.

Purlins and Side Rails | Key Benefits and Links | Metsec

The Hi-Span Eaves Beam is a versatile structural element combining the functions of an eaves purlin and a side sheeting rail, column tie and gutter support. Designed to cater for spans up to 12.0m, it is available in four depths of varying thicknesses with an angled top flange giving a choice of roof slopes 0 o, 5 o, 10 o, 15 o, 22.5 o, and 30 o.

Eaves Beam Fixing Details - Hi-Span

06-06-2017 07:40 AM. The purlin macro is designed to place rails on both the column and the rafter and as such it will try to place the eaves beam on the lower end of either the column or rafter. I think this is as designed and you simply need to tick off create the eaves beam toggle when it places on the columns.

Solved: Purlins and or Side Rails - Autodesk Community

Purlins and girts are complementary products to structural steel and used primarily in the walls and roof of a building. All purlins and girts are cold-formed using high-performance steel in order to minimize weight while maximizing capacity. As with all Canam Canada products, our purlins and girts meet strict quality standards.

Purlins and Girts - Canam Bâtiments

Hi-Span offer a range of Purlins, Rails, C-Channels and Eaves Beams designed for use with most types of building as secondary supports for cladding materials. Not only does Hi-Span offer a fully comprehensive range of sections but also the facility to manufacture bespoke sections to meet client's individual needs.

Hi-Span Ltd - Wymondham - Steel Buildings | construction.co.uk

A purlin (or historically purline, purloyne, purling, perling) is a longitudinal, horizontal, structural member in a roof.In traditional timber framing there are three basic types of purlin: purlin plate, principal purlin, and common purlin.. Purlins also appear in steel frame construction. Steel purlins may be painted or greased for protection from the environment.
