Pterosaur Reconstruction Answers - Free PDF File Sharing Procedure: Use the drawings of S. crassirostris bones to cut out and reassemble a model of the flying reptile. Glue the model bones to a Page 7/14

sheet of construction paper being sure to center the model and keep all bones on the paper. Use the metric ruler to measure the complete wingspan of the organism (tip to opposite tip).

Pterosaur Reconstruction Bi -BIOLOGY JUNCTION Pterosaur anatomy is reconstructed from fossils such as these: a beautifully articulated but flat Pterodactylus from Solnhofen (top), and a three-dimensionally preserved but partly disarticulated Anhanguera pelvis from the Santana formation, Brazil (bottom). Restoring the anatomy of any pterosaur starts with the fossil remains.
