Open access is free, online access to research literature that would otherwise require institutional subscriptions to journals. The University's Open Access website has information about funder requirements (UKRI, Wellcome Trust and others), and what you can do to make your publication open access, for example through deposit to the Oxford Research Archive.

Open access | Research Support

Open access and collaboration through open research practices at an interdisciplinary, intersectoral and international level further enhance the development of research and have a positive impact on research culture and research integrity, as well as providing a diversity of perspectives and critical insights across different research contexts.

#VitaeChat: Open Access and Open Research | Vitae Website

Open access (OA) means making research publications freely available so anyone can benefit from reading and using research. Open access can be more than making research available to read, but also allowing others to re-use that research. For example, allowing the content to be analysed using text mining¹ or reused for commercial purposes.

An introduction to open access | Jisc

Open access (OA) can be defined as the practice of providing on-line access to scientific information that is free of charge to the user and that is re-usable. In the context of R&D, open access to 'scientific information' refers to two main categories: Peer-reviewed scientific publications (primarily research articles published in academic journals)
