The 25th revised edition of Pharmacology and Pharmacotherapeutics continues to maintain its status as an up-to-date, accurate and reliable text for medical students as well as practicing physicians. The advances in molecular biology have significantly influenced the understanding of pathogenesis of diseases and development of newer drugs. The real challenge, however, remains in application of the available information while treating a patient. This book has

always placed before the readers an integrated approach intertwining current knowledge of pathophysiology of the disease, pharmacology of available drugs and strategies for medical management of diseases. The current edition balances the complexity and simplicity of scientific content to provide students of medicine and/or pharmacy an insight into rational therapeutics. It gives several practical tips which empowers the physician to treat patients effectively and confidently. Written in an integrated fashion, Pharmacology and Pharmacotherapeutics builds up a strong foundation of scientific knowledge to guide decision making and to promote a holistic approach towards patient care in clinical practice. Emphasis on Clinical Pharmacology in each chapter Current guidelines for therapeutic decisions Newer sedatives-hypnotics Hypertension management: Updates Advances in treatment of obesity and hyperlipidemia Newer antiepileptics Antiviral agents for hepatitis C Rheumatoid arthritis: pharmacotherapy Management of pulmonary hypertension Newer antidiabetic drugs Advances in immunotherapeutics Vitamin D and calcium: Updates Therapeutic advances for infectious diseases

This book strengthens the scientific knowledge base and promotes rational thinking among students The Medical Council of India (MCI) has introduced a competency-based curriculum in 2019, which not only lays emphasis on integration with clinical and pre-clinical subjects but also clearly states subject competencies and defines domains and levels to be achieved for each of them. In addition, it is clinically oriented and gives due importance to the self-directed learning. The duration of teaching for the subject of Pharmacology in the new curriculum has been reduced to one year with additional dedicated time to revisit it in the subsequent years. This 26th edition of Pharmacology and Pharmacotherapeutics has been revised considerably to match the demands of the new curriculum. Right from its conception, this book has used an integrated approach intertwining current knowledge of pathophysiology of the disease, pharmacology of available drugs and strategies for medical management of diseases. We have made every attempt to provide up-to-date information about the drugs while focussing on the aspects relevant to their use in clinical practice. Structured pedagogy facilitating feature-rich presentation and organization of the content, which makes it more student friendly Richly illustrated content supplemented with large number of tables and boxes - explaining physiology, complex concepts, relevant drug features and principles of pharmacotherapy Mechanisms of drug actions, explained in text and illustrated via diagrams as well as videos (animations) for better understanding and retention Key points in pharmacology and pharmacotherapy of diseases highlighted throughout the book Practical tips in this book serve as a reference guide in practice so that students can treat their patients effectively and confidently What's New Thoroughly revised content, fully in line with the New CBME Curriculum Knowledge-related competencies labelled within the text Drug information fully updated, presented in crisp and integrated manner Illustrations increased, converted to multicolour graphics Core points and therapeutics highlighted with coloured backgrounds in the text Widely reviewed and updated text, in line with feedback from faculty members and students
