But here, if you do not have Sheldon Ross Stochastic Processes Solution Manual Solution: From (c),  $\Pr \left[ \bigcap_{n=1}^{\infty} A_n \right] = \lim_{k \rightarrow \infty} \Pr \left[ \bigcap_{n=1}^k A_n \right]$ . From (b), however,  $\Pr \left[ \bigcap_{n=1}^{\infty} A_n \right] = \Pr \left[ \bigcap_{n=1}^{\infty} B_n \right] = \Pr \left[ \bigcap_{n=1}^{\infty} A_n \right]$ . Combining the first equation with the limit in  $k$  of the second yields the desired result.

Sheldon M. Ross: free download. Ebooks library. On-line ... Stochastic processes are used in more and more areas, and perhaps if you come from a different background there's a better book for you. Ross doesn't hit some topics which would be useful to people in finance or economics, for example, like stochastic calculus, and his emphasis on aspects of queueing theory would probably be downplayed in a book written today.
