Many people lucky enough to have grown up with doting grandmothers know that they can burnish a child’s development in unique and valuable ways. Now, for the first time, scientists have scanned ...

How grandmothers' brains react to the sight of their grandchildren

Young children have likely evolved traits to be able to manipulate not just the maternal brain, but the grand-maternal brain, " the study ' s lead author said.

Surprising new study finds grandmothers more connected to grandchildren than to own children

What exactly happens to the brains of grandmothers when they see their beloved grandchildren? Researchers have captured a "neural snapshot" of the reaction, and it's different from what happens when ...

What Happens To Grandmothers' Brains When They See Grandchildren? New Study Captures Their Reactions

' Human brains have decreased in size approximately 3,000 years ago. New study hypothesize that this was due to collective intelligence or ' wisdom of the crowds ' , among the human society that ...

Answers to Brain Evolution Revealed

White British people who have been diagnosed with a malignant primary brain tumor appear to be more likely to die within one year than patients from at least four other ethnic groups according to a ...

Study explores the impact of ethnicity on brain tumor survival

To disentangle this mystery, Dr. DeSilva and colleagues set out to study the historical patterns of human brain evolution, comparing their findings with what is known in ant societies to offer ...

Human Brains Decreased in Size 3,000 Years Ago, New Study Says

MIT Professor Bilge Yildiz works collaboratively on research that impacts a wide range of technologies. What brings it all together is the electrochemistry of ionic-electronic oxides and their ...

Electrochemistry, from batteries to brains

Although the COVID-19 pandemic profoundly impacted all our work and living arrangements, one thing particularly stood out for dads. During the nationwide ...

Neuroscience research: Caring and confident dads have structurally different brains

a team of researchers from different academic fields set out to study the historical patterns of human brain evolution, comparing their findings with what is known in ant societies to offer broad ...

When and why did human brains decrease in size 3,000 years ago? Ants may hold clues

Understanding why brains increase or decrease is difficult to study using only fossils," explained Traniello. "Ant and human societies are very different and have taken different routes in social ...

Ants could offer new clues to human brain evolution

Neurons live in a society, and scientists just found the ones ... and why this happens is a mystery. The new study takes an unprecedented peek into the brain as it interacts with another being. It ...

Friend or Foe? Single Neurons in the Brain Control Social Interaction, Study Finds

Cortical organoids that contain non-neuronal brain cells called microglia may reflect human neurodevelopment more faithfully than those that don ' t.

Including immune cells in brain organoids improves model ' s accuracy

OK, maybe it's a few — may be associated with a lower risk for stroke and dementia, according to a new study. Among more than 360,000 participants studied over a period of 10 to 14 years, those who ...

Tea and coffee linked to reduced risk of stroke, dementia

WASHINGTON: Scientists say they have proven what many people fortunate enough to grow up with theirs have known all along: grandmothers have strong nurturing instincts and are hard-wired to care ...

It's official: Grannies are good for children, study says

The Alzheimer ' s Association, Global Brain Health Institute (GBHI), and the UK-based Alzheimer ' s Society have united to address global challenges in dementia through a competitive funding program for ...

Funding for new dementia-related projects awarded to global brain health leaders

The study mentions that the studied fossil is a specimen of a bird called Ichthyornis, which went extinct at the same time as other non-avian dinosaurs.

Ancient Birds' Brain Shape Helped Them Survive Extinction Unlike Dinosaurs: Study

A collaboration between Kyoto University and Akita University, Japan, and led by ASHBi Professor Motoko Yanagita has found a common but previously unappreciated observation of kidney grafts, tertiary ...

Predicting the success of kidney transplantations
