2005-Toyota Yaris steering angle sensor (SAS) reset. After replacing vehicle stability control components or after undertaking a wheel alignment , the SAS requires to be calibrated. SAS can be reset using suitable scan tool, or perform the following: Clear the zero point calibration data: Turn the ignition switch off

~~SAS calibration on Toyota Yaris - Total Car Diagnostics~~

Step 1: Turn the steering wheel first as far as it will go anticlockwise and then as far as it will go clockwise. Step 2: Turn off the engine and remove the key from the ignition. Step 3: Remove driver side wheel, stop and park vehicle. Step 4: Turn off ignition, remove key, wait 10 seconds.

~~How to Reset Steering Angle Sensor? | Auto Repair ...~~

Turn the ignition to OFF and remove the jumper wire. Make sure the steering wheel is centered, and turn the ignition switch back ON. The stability control warning light will come on, then go off after about 15 seconds. Wait at least two seconds after the light goes off, then turn the ignition back OFF.

~~Zero Point Calibration step by step help | Toyota Tundra ...~~

First off disconnecting the steering angle sensor will not reset the can and will not fix your ac. Compressor failure rate is extremely high on that model year Corolla. I have replaced alot! Unfortunately you will need a Toyota scan tool to diagnose it since it is a scroll type compressor.

~~How to replace steering angle sensor in a 2010 Toyota ...~~

Here is how to remove and replace a steering angle sensor: Determine the faulty sensor, using an error code scanner. Search for the bad sensor in the steering column or near the wheels. Browse the car's manual for a detailed explanation of the sensor's location.

~~Symptoms of a Bad Steering Angle Sensor & Replacement Cost~~

(1) Check that the steering wheel is in the straight-ahead position and move the shift lever to the P position. NOTICE: DTC C1210/36 and C1336/39 will be recorded if the shift lever is not in the P position (See page BC-165). (2) Connect the intelligent tester to the DLC3. (3) Turn the ignition switch on (IG).

~~Toyota Avalon Perform Zero Point Calibration - Toyota ...~~

So, I hook up the Techstream and the "Steering angle sensor" showed 4.5 to 6 degrees when the steering is in straight position (according to my view). I looked for the option to reset it, but found only "Torque sensor zero point adjustment" and "Rotation Angle Sensor Initialization".

~~Prius 3, reset steering angle sensor | PriusChat~~

Don't connect your steering wheel to your PC yet. Press the windows key and open the Thrustmaster control panel (see the general steps). Navigate to the 'Test input' tab. Set the value at rotation angle to 1080 degrees. Place the axis by dragging in the middle, at 50%.

~~How do I calibrate my Thrustmaster racing wheel ...~~

Scan Tool Steering Angle Sensor Reset There are many options for scan tools to reset SASs. Some tools are even integrated into an alignment system. But, most tools recommend that the calibration be performed on a level surface. Also, it is a good idea to perform a lock-to-lock turn to complete the calibration.
