Confronting Models with Data (MPB-28) ... The Ecological Detective makes liberal use of computer programming for the generation of hypotheses, exploration of data, and the comparison of different models. The authors' attitude is one of exploration, both statistical and graphical. The background required is minimal, so that students with an ...

The Ecological Detective – Confronting Models with Data ...

The notion of the ' ecological detective ' neatly summarises this. The work of an applied ecologist is akin to that of a detective: we are frequently constrained in terms of the amount of evidence that is available, and ecology generally proceeds by contrasting the compatibility of a number of competing hypotheses with the data rather than a ' tree ' of successive hypotheses.

The Ecological Detective: Confronting Models with Data by ...

The Ecological Detective was an excellent, very readable introduction to the idea of combining data and models. Hilborn and Mangel have made a good case for something other than Popperian hypothetico-deductive methods in ecology, and done so in a way that demystifies the use of ecological models, maximum likelihood estimation and Bayesian statistics.
