The Effects Of Opuntia Cactaceae On Lowering

This insect, a primarily sessile parasite, lives on cacti from the genus *Opuntia*, feeding on moisture and nutrients in the cactus sap. The insect produces carminic acid, which deters predation by other insects.

Opuntia - Wikipedia

The cladode, flower and fruit infusions show a modest but not significant increase in natriuresis and kaliuresis (Fig. 2, Fig. 3). Download : Download full-size image Fig. 2. Effect of oral administration of *Opuntia ficus indica* (L.) Mill. 15% cladode, flower and fruit infusions (5 ml/100 g b.w.) on the urinary concentrations of sodium and potassium in rat (mean \pm S.E.).

Biological effect of *Opuntia ficus indica* (L.) Mill ...

Opuntia is the most widespread of all genera in the cactus family. The genus occurs naturally throughout North and South America from as far north as Canada, through the Caribbean, and down into Argentina. With man's help, however, this species can now be found world-wide where it has escaped cultivation and become naturalized even to the point ...

Opuntia - Cactus

O. aurantiaca has shown itself to be a serious invasive weed on natural grasslands in Australia and South Africa for over a hundred years, reducing carrying capacity, injuring livestock and reducing the value of animal products. It was introduced as an ornamental species and spread rapidly via dispersal of vegetative parts.

Opuntia aurantiaca (jointed cactus)

However, a study of the effect of *C. cactorum* on native *Opuntia* in St Kitts and Nevis 50 years after its introduction found that residual populations remained and concluded that the potential impact of *C. cactorum* on native North American and Mexican *Opuntia* will be significant and variable, but not necessarily catastrophic (Pemberton and Liu, 2007).
