Physical geography is the study of our planet and its systems

(ecosystems, climate, atmosphere, hydrology). Understanding the

climate and how it's changing (and the potential results of those

changes) affect people now and can help plan for the future.

Because the study of Earth is vast, numerous sub-branches of

physical geography specialize in different areas, from the upper

limits of the sky to the bottom of the ocean.

Human geography Since 1945

human geography has contained five main divisions. The first four—economic, social, cultural, and political—reflect both the main areas of contemporary life and the social science disciplines with which geographers interact (i.e., economics , sociology , anthropology , and political science and international relations , respectively); the fifth is historical geography .
