The Nature of Human Intelligence | Request PDF

Human intelligence, mental quality that consists of the abilities to learn from experience, adapt to new situations, understand and handle abstract concepts, and use knowledge to manipulate one 's environment. Much of the excitement among investigators in the field of intelligence derives from their attempts to determine exactly what intelligence is.

human intelligence | Definition, Types, Test, Theories ...

Evidence of a general factor of intelligence has been observed in non-human animals. The general factor of intelligence, or g factor, is a psychometric construct that summarizes the correlations observed between an individual's scores on a wide range of cognitive abilities. First described in humans, the g factor has since been identified in a number of non-human species.

Richard Haier on the Nature of Human Intelligence | Scott ...

Intelligence is the tool for the soul (life-atom) to see the logical sequence in evolution resulting in human beings to experience reality. This being the existential reality, intelligence is one among the many ingredients that helps a human being experience. Why should we let our intelligence become a limiting factor? It is the same intelligence that will help man realize that he should not hurt the feelings of any other fellow human being.
