The precaution adoption process model (PAPM) is a psychologically focused model that is most useful in describing how a person comes to a new decision, and how that person can take the decision and make it become an action. The concepts of the model were first discussed in 1988, with a formal accepted formulation of the model coming in 1992 (Weinstein and Sandman, 2002).

The Precaution Adoption Process Model. by Abubakar Binji in Health Theories, Healthcare Research March 30, 2020. The PAPM attempts to explain how a person comes to decisions to take action and how he or she translates that decision into action. Adoption of a new precaution or cessation of a risky behavior requires deliberate steps unlikely to occur outside of conscious awareness.

The Precaution Adoption Process Model - Ranaconsultancy

The Precaution Adoption Process Model provides this guidance by building on the core elements of the HBM and considering how a person comes to decisions to take action. 26 Specifically, the...

(PDF) The Precaution Adoption Process Model and its ...

Such considerations suggest that the adoption of new precautions should be viewed as a dynamic process with many determinants. The framework of a model that is able to accommodate these additional factors is described. This alternative model portrays the precaution adoption process as an orderly sequence of qualitatively different cognitive stages. Data illustrating a few of the suggestions made in the article are presented, and implications for prevention programs are discussed.

The Precaution Adoption Process - APA PsycNET

Weinstein's Precaution Adoption Process, a stage model appropriate for risk communication guided the intervention. Outcomes are conceptualized as stages of decision making linked to

having disaster supplies and creating a family communication plan.

Using the Precaution Adoption Process model to describe a ...

We present the precaution adoption process model--a stage theory consisting of seven distinct states between ignorance and completed preventive action. The stages are "unaware of the issue," "aware of the issue but not personally engaged," "engaged and deciding what to do," "planning to act but not yet having acted," "having decided not to act," "acting," and "maintenance."
