The rhesus macaque (*Macaca mulatta*) is a species of Old World monkey.It is listed as least concern in the IUCN Red List of Threatened Species in view of its wide distribution, presumed large population, and its tolerance of a broad range of habitats.It is native to South, Central, and Southeast Asia and has the widest geographic range of all non-human primates, occupying a great diversity of ...

Rhesus macaque - Wikipedia The rhesus macaque is the closest animal model to the human, and investigations into the brain of the rhesus monkey has shed light on the function and organization of the primate brain at a scale ...

(PDF) A combined MRI and Histology Atlas of the Rhesus ... The rhesus macaque average atlas is comprised of 7 T1-weighted MRIs of normal young adult rhesus macaque brains. This atlas is not based on a single subject but instead is an average constructed from the averaged position, orientation and scale from all the individual subjects and is representative of both the intensities and spatial positioning of anatomical structures.

BIC - The McConnell Brain Imaging Centre: Rhesus The binding characteristics of the kappa opioid ligands [3H]U69,593 and [3H]bremazocine, the mu opioid ligand [3H][D-ala2,N-Me-Phe4-glyco5]enkephalin and the delta opioid ligand [3H]p-Ch[D-pen2,5]enkephalin were studied in rhesus monkey brain membranes in saturation binding experiments and were followed by competition binding experiments with a variety of peptidic and nonpeptidic opioid ligands.

kappa-Opioid receptor binding populations in rhesus monkey ... Dopaminergic neuron loss in the monkey brain was induced in this study by 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP) toxicity. MPTP is a neurotoxin that causes the selective death of dopaminergic neurons and as a result, a decrease in the level of DA through the inhibition of mitochondrial energy metabolism (Morfini et al., 2007).

Severe dopaminergic neuron loss in rhesus monkey brain ... It is the first rhesus monkey brain atlas with horizontal, coronal, and sagittal planes of sections, derived from the same animal. It shows the first detailed delineations of the cortical and subcortical areas in horizontal, coronal, and sagittal plane of sections in the same animal using different staining methods.
