The Tropic of Cancer, which is also referred to as the Northern Tropic, is the most northerly circle of latitude on Earth at which the Sun can be directly overhead. This occurs on the June solstice, when the Northern Hemisphere is tilted toward the Sun to its maximum extent. It also reaches 90 degrees below the horizon at solar midnight on the December Solstice.

Tropic of Cancer - Wikipedia
Tropic of Cancer is a novel by Henry Miller that has been described as "notorious for its candid sexuality" and as responsible for the "free speech that we now take for granted in literature". It was first published in 1934 by the Obelisk Press in

Online Library The Tropic Of Cancer By Henry Miller

Paris, France, but this edition was banned in the United States. Its publication in 1961 in the U.S. by Grove Press led to obscenity trials that tested American laws on pornography in the early 1960s. In 1964, the U.S. Supreme Court declared the book n

Tropic of Cancer (novel) -
Wikipedia

Tropic of Cancer, latitude approximately $23^{\circ}27'$ N of the terrestrial Equator. This latitude corresponds to the northernmost declination of the Sun 's ecliptic to the celestial equator. At the summer solstice in the Northern Hemisphere, around June 21, the Sun attains its greatest declination north and is directly over the Tropic of Cancer.
