states create international organizations to do things they are unable or reluctant to do on their own, yet consider inherently useful: organize postal relations, control the uses of atomic energy, regulate global health, etc.

Theorizing International Organizations - Oxford Handbooks

Most students of international organizations accept the proposition that, in one way or another, international organizations can be studied in terms of principal/agent theory, albeit perhaps with a few twists: the principal is by definition collective and usually represented with the agent in the form of a plenary organ. 2 Most also accept the proposition that international organizations do not so much represent an abdication of sovereignty but may actually be of assistance in furthering ...
