## Transmission Fluid for Your ...

The Toyota Maintenance Guide for the four-cylinder Camry 5SFE engine says to inspect the automatic transmission fluid (ATF) every 30,000 miles. It doesn't say when or whether to replace the fluid, but in general, mechanics recommend a simple "drain-and-fill" every 30,000 miles. With most automatic transmissions, ATF operating at or below 175 degrees F should last close to 100,000 miles.

## Toyota Camry ATF (Transmission Fluid) Flush / Exchange or ...

The average cost for a Toyota Camry transmission fluid change is between \$170 and \$201. Labor costs are estimated between \$120 and \$152 while parts are priced at \$49. This range does not include taxes and fees, and does not factor in your unique location. Related repairs may also be needed.

fact that the flush not only replaces the fluid in the pan but also removes fluid from the cooler lines and other parts of your transmission. A 2020 Toyota Camry transmission flush also uses about 10 quarts of fluid to completely clean and flush out the system.

### 2020 Toyota Camry Transmission - Nalley Toyota

The Camry is Toyota's midsize sedan. Its transmission fluid should be checked as frequently as you change the motor oil. When checking the fluid, you will need to observe if the fluid is a red color. In the case the fluid is not red, you may need to have the transmission inspected by either a respected mechanic or the Toyota dealer.

## Camry Transmission Fluid

Generally speaking, transmission fluid replacement and inspection intervals can range anywhere between 15,000 and 100,000 miles. Toyota recommends that vehicles featuring an automatic transmission have their fluid changed every 60,000 to 100,000 miles. Vehicles with manual transmissions should have their fluid changed every 30,000 to 60,000 miles.

### How Often Should Your Replace or Inspect the Transmission ...

A transmission flush is usually twice the price of a fluid change due to the amount of time the service takes and the fact that the flush not only replaces the fluid in the pan but also removes fluid from the cooler lines and alternative parts of your transmission. A 2014 Toyota Camry transmission flush also uses about 10 quarts of fluid to completely clean and

When adding transmission fluid to your Camry, be sure to add it slowly as it will fill up quickly and is difficult to remove excess fluid if you overfill. If you are having problems with the transmission in your Camry, such as clunky shifting or hesitation, check the fluid level first - it is amazing how many drivers pay thousands of dollars for transmission work when a half quart of transmission fluid would
