Ulnar Nerve Entrapment Guide - Drip

Nerve entrapment (compression) occurs when direct pressure is put on a nerve in the body. When the ulnar nerve is compressed it will not function and mobility will be affected. The nerve can be put under pressure at various points along the arm resulting in compression. The ulnar nerve gets trapped in the collarbone, wrist and in the elbow.

Ulnar Nerve Entrapment Symptoms and Treatments - Nerve Injury

Ulnar nerve entrapment commonly causes pain, numbness, tingling and a "falling asleep" sensation in the little finger and ring finger. These symptoms are greater when the elbow is in a bent position in many cases. Some patients may also experience weakening of grip, muscle wasting and finger coordination difficulty.
