Remote work is work done outside of a traditional office environment, also referred to as working from home or telecommuting. The concept of remote work is that employees can successfully execute projects and daily tasks without needing to commute to an office each day.

What Is Remote Work? | Indeed.com

– A remote I/O module is physically located at a distance from the control PLC. Remote I/O's are used: – Because in some industrial applications, it's not possible to have a PLC with Local I/O Modules near the field devices because of the harsh environment.

What is Remote I/O? | Remote I/O for PLC | RealPars

A remote computer (also known as remote desktop or remote access) is a physical personal computer to which a user does not have physical access, but that can be accessed or interacted with. Unlike

servers, remote computers are mainly used for peer to peer connections, where one device is unattended.

Remote computer - Wikipedia

Remote Assessment follows the same modules and grading criteria as face-to-face EPA. Once your learner passes Gateway, the End Point Assessor sets up a call with the learner, employer, and training provider. This is the Planning Meeting. On this call the assessor will outline the stages of EPA, answer any questions, and set initial dates.

What is Remote Assessment? | Instructus Skills

Remote access refers to the ability to access a computer, such as a home computer or an office network computer, from a remote location. This allows employees to work offsite, such as at home or in another location, while still having access to a distant computer or network, such as the office network.

What is Remote Access? - Definition from Techopedia

A remote employee is someone who is employed by a company, but works outside of a traditional office environment. This could mean working from a local coworking space, from home, at a coffee shop, or in a city across the world. This is a multi-step process and not something that should be jumped into without a bit of thought.
